

Specification Features

Hazardous Area

Non-armoured series

Cable type: Non-armoured/ Marine shipboard/ Tray cable/ Type P

Cold flow Protection

Armoured series

Cable type: SWA / SWB / STA/
Braided marine shipboard / Lead sheathed/ Type P

Advantages benefit for your choice

Faster lead time for projects 8-10 weeks and stock inventory available for MRO

- **Competitive price**
- **Product weight Reduction in the project around 41% weight for Freight cost saving**
- **Comply with IEC60079-0 and IEC60079-14 External cable clamping for strain relief**

"IEC60079-0: Equipment -General requirements

Part: A.2.3 Clamping Cable glands shall provide clamping of the cable to prevent pulling or twisting applied to it from being transmitted to the connections"

"IEC60079-14: Electrical installations design, selection and erection :

Part: 9.3.10 Connections of cables to equipment The connection of cables to the electrical equipment shall maintain the explosion protection integrity If an additional clamping is required to prevent pulling and twisting of the cable transmitting the forces to the conductor terminations inside the enclosure, a clamp shall be provided and placed within 300 mm of the end of the cable gland

ADE series/cable glands

ADE external clamping module Available with all ADE range

General Specification for ADE series

Material specification

- Nickel-plated brass
- Option:
- 316L Stainless steel
- Aluminum
- Bronze

Seal material

- Silicone - for extended temperature performance

Operating temperature range

- Silicone seals -60°C to +140°C
- Barrier compound -60°C to +80°C

Ingress Protection

- IP66/IP68

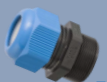

Non-armoured Braided cable For EMC specific cable and application

NEWCAP MS-e / CT-e

EXACAP Ex-e

EXACAP Ex-i

Nylon material Non-armoured

TRUMPET Ex-e

Versatile industrial cable glands

Non-hazardous
